	PAG 37 middle	-	BC40-19005	DE45555-8	DE45555-8	-

The Nørdus products are always delivered unfinished and should yet be treated by the processor. We already illustrate a number of possible finishes throughout the brochure. In order to do so, we relied on the expertise and creativity of two partners who are specialists in colouring and protecting wooden surfaces.

Hesse Lignal has been specialising in the production of high-quality paints and stains for over 100 years. In doing so, they concentrate on environmentally-friendly water paints, modern UV systems and products made of sustainable raw materials. Their years of experience in finishing wooden surfaces using high-quality paints offers unlimited possibilities to fully customize Nørdus.

The Belgian company Rubio Monocoat simplifies the finish of a wooden surface to applying only one single layer. Rubio Monocoat oil features some unique characteristics. It anchors within a blink of an eye with the upper fibres of the wood via molecular binding. This ensures that these oils are ecological, high-quality and easy in use.
